

The Imperial Quilting Frame

The New Imperial Quilting Frame for Inspira is the next step forward in machine quilting. This new frame combines all of the great concepts from the previous model with exciting new features that greatly enhance the quilter's experience. The Imperial Frame is Q-Bot compatible, and works with all of Grace accessories.

You will love the frame's fully-featured carriage that enhances your control and the ease-of-movement along the track, 2" Professional Series Rails (including Fabri-Fast™ system), and other distinct innovations.

The Imperial Frame is perfect for any sewing machine with up to an 18" throat space.

Distiguishing features:

- New large diameter Professional Series Rails
- New Radial Ratchets
- Fixed, Dual-Handle Carriage System
- New handle center support
- Rigid-Contact Wheel/Track Design
- Machine Base Clamps
- Height adjustable legs
- Sturdy frame design
- 4th Rail allows for a full roll of batting
- Included Utility Shelf
- Included Laser Stylus
- Long enough carriage stroke for machines up to 16" - 18" throat

inspira

New Radial Ratchet Design

The radial ratcheting system is more user friendly and includes an all new fail-safe design.

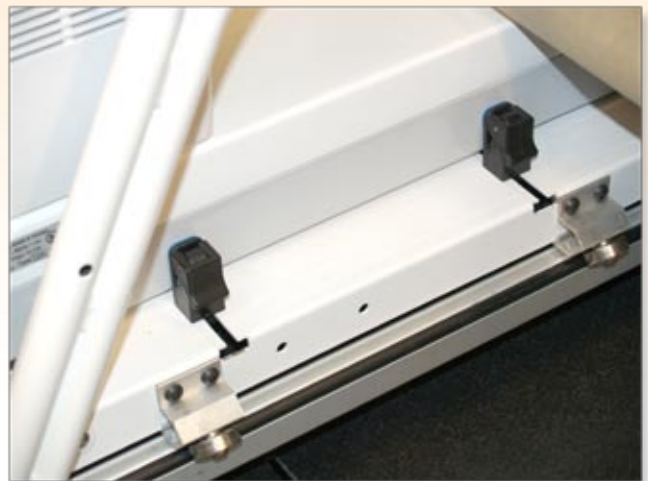

New large diameter Professional Series Rails

The large 2"/1.5" diameter rail design increases overall rail strength. The rails also include the Fabri-Fast™ system for quick and easy fabric installation.

Fixed, Dual-Handle Carriage System with Machine Base Clamps

The carriage includes fixed handles to increase overall carriage rigidity. Dual foam covered handles allow the user to work from either side of the frame in comfort. The handle center support now incorporates scissor and pin holders. The new Machine Base Clamps ensure that the sewing machine stays locked to the carriage top-plate improving both stitch quality and accuracy. The frame maintains a similar handle design keeping brand continuity.

inspiration

Sturdy frame design

An all new angled leg design provides amazing frame rigidity while simplifying assembly.

Height adjustable legs

Height adjustable legs allow the frame to be raised or lowered in one inch increments from 36" to 42" (Fabric Surface Height).

Rigid-Contact Wheel/Track Design

The new multi-bearing wheel and track design eliminates flex while maintaining a smooth carriage motion.

The new frame also includes:

- Utility Shelf - Keeps your extra fabric and notions handy.
- Laser Stylus - Quilters can follow patterns using the cordless laser stylus from multiple locations on the carriage.
- Two Sizes Included - The frame can be assembled in two sizes - Crib (60") and King (120").
- Streamlined Assembly Process - With new simplified assembly steps, users will glide through frame setup and get to their quilting projects sooner. A step-by-step instructional DVD is also included.
