

# Denim embellishing

With this technique you can embellish denim fabric without adding anything, using the punching machine on its own.

### You need:

- Dark blue denim fabric.
- Pfaff fabric marking pen part no 412 7525-01
- Printed butterfly template
- Paper scissors
- hobby™ 350p punching machine

### 1 Paper pattern

Cut out the butterfly pattern from the template. Trace the butterfly on the wrong side of the denim fabric using the Pfaff fabric marking pen.

### 2 Embellish/punching

- Start punching the butterfly on the wrong side of the denim and punch over the entire butterfly. Turn your denim fabric right side up periodically to check your results and determine where you need to do more punching to create a more visible effect.
