

Stitch Download

If you haven't updated your machine to the latest Pfaff creative 2170 software we recommend that you do that first. You can download the software from the Pfaff website, www.pfaff.com.

Select the stitches that you want from the www.pfaff.com website. Unzip and save it on your computer. To transfer the stitches to your Pfaff creative 2140/2144 or 2170, do the following steps:

1. Connect the USB or serial cable from your computer to your sewing machine. Start your sewing machine.
2. Start your 3D File Assistant on your computer. In the middle section, find and select the stitches you want to transfer. They are presented in the form "stitchname.9mm" (A).
3. On the right side press the 9mm/MAXI button (B).
4. Transfer the selected stitch/stitches to your machine by pressing the arrow pointing to the right (C).
5. Depending on your software version you will find the stitches on the following places in your machine.
a: 2170 Main menu - Personal stitches - Stitch creator stitches
b: 2140/2144 Main menu - decorative stitches- Stitch Artist
