

9 Basic Precise Positioning

9.1 Leaf pattern

1. **Embroidery Mode.**

2. **Selection Menu.**

3. Touch **Designs**.
Select design **56**.

4. **Go to Embroidery stitch-out.**
Press **Start/Stop** to begin embroidery.

5. When the embroidery is completed, a pop-up informs you that your embroidery is finished. Touch **OK**. The design remains on the screen in Embroidery stitch-out.

6. Touch **Return to Embroidery edit.**

7. Touch the design to select it.

8. **Mirror image side-to-side.**

9. **Go to Embroidery stitch-out.**

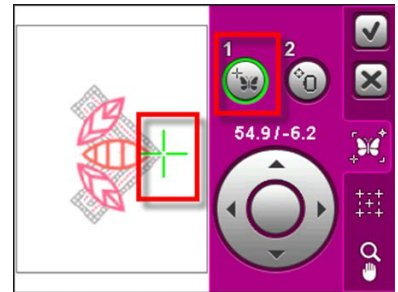

10. Re-hoop your fabric as straight as possible to the left of the first design. The next design will connect to the left side of the first design.

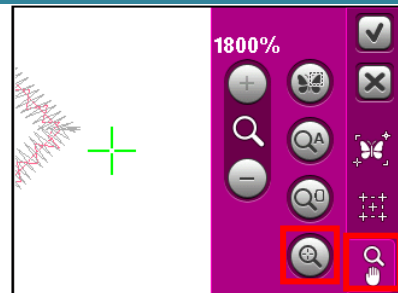

11. Select **Basic Precise Positioning**.

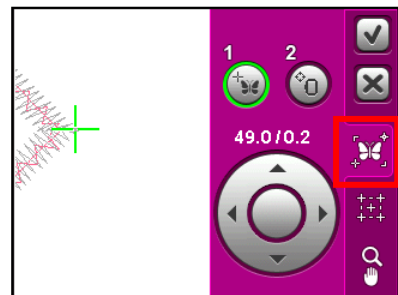

12. Touch #1 **Select Locking Point on Screen**. Place the crosshair on the point of the design as shown.

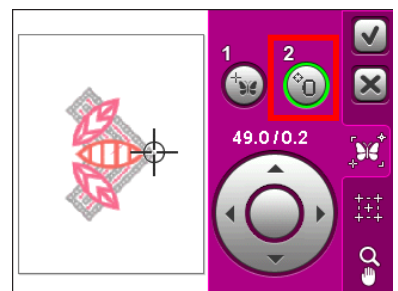

13. Click on **Zoom options/pan** and select **Zoom to Needle**.

14. Click on the **Wheel Control Tab**. Drag on the screen or use the arrows to place the crosshair at the very tip of the design.

15. Touch #2 **Place Locking Point on Fabric**.

PFAFF

Perfection starts here.™

16. Use the arrows to move the hoop under the needle until the needle is exactly above the center point of the first embroidery.

-
17. Click **OK** to accept changes and close Basic Precise Positioning.

-
18. Press **Start/Stop** to begin embroidery.
