

Tips and Hints – Folklore Pillow

Create your own folklore design combination with the built-in embroideries on PFAFF® sewing and embroidery machines. The embroideries are combined and arranged in your computer using the Embroidery Intro Software.

Finished size: 9.5" x 21.5" (24cm x 54cm)

Supplies:

- PFAFF® sewing and embroidery machine
- *creative*™ Master Hoop 240x150mm #412968502
- Embroidery Intro Software
- PFAFF® Candlewicking Foot for *IDT*™ system #820613096
- *INSPIRA*™ Tear-A-Way stabilizer
- Robison Anton embroidery thread in various colors
- Bobbin thread
- Sewing thread to match the fabric
- Embroidery needle, size 75
- General sewing supplies: marking pen, pins, embroidery scissors
- USB embroidery stick
- Fabric: Woven medium, cotton canvas 12" (30cm)
- Invisible zipper

Create the embroidery combinations in the Embroidery Intro PC Software.

Below you can see how to place the embroidery designs for the combination of the Folklore cushion. Create a hoop within the Embroidery Intro that is equal to the size of the pillow: 540mm wide x 240mm long. This will make it easy to plan your entire layout.

Print out the combination as one design, as that will help you to line up the embroideries on the front part of the pillow.

In order to sew the embroidery it has to be divided into five parts to sew out in the creative Master Hoop 240x150mm. Create each area as one design and combine each section according to the template below.

Embroidery Combination 1:

- Single initial, Adina font (from the software) - size 25mm
- Cr_007 positioned as desired above and below.

Combinations 2-5:

- Save each embroidery combination to the USB embroidery stick.
- Print out each section to use as a template on your fabric.
- Draw marking lines on the center of each embroidery design as well as the center horizontal line and vertical line from the print out of the template for easy transfer of embroidery positions to the fabric, with a dissolvable marking pen to hoop correctly.

Decorate with Candlewicking stitches

Decorate between the combinations of embroideries by using the optional **Candlewicking**

foot for *IDT*™ and stitch 

See illustration where to add the Candlewicking stitches.
