1 spool 12 weight cotton thread

1 spool rayon embroidery thread that matches the 12 weight thread

1 spool sewing thread that matches the 12 weight thread and the rayon thread.

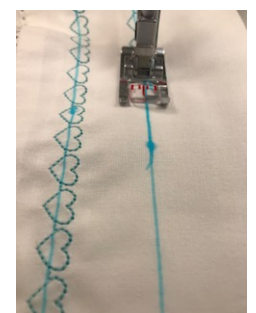

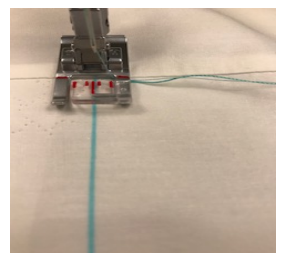

2 bobbins

Blue washout marker

Ruler

Sewing

1. Wind one bobbin with 12 weight cotton thread.
2. Wind the other bobbin with sewing thread.
3. Insert a 90 embroidery needle into your machine.
4. Remove bobbin case from your machine and insert the creative bobbin case into the machine.
5. Place the bobbin wound with the 12 weight thread into the bobbin case.
6. Select a simple open stitch on your machine. The open heart stitch works well. If using the creative icon™ sewing and embroidery machine the stitch number is 6.1.8.
7. On the wrong side of the pillow case, mark 1” from where the pillowcase body and the heading are joined using a washout marker.
8. Place the 2A foot on your machine and line the center marking on the foot to the marked line.
9. Pull the bobbin thread to the top and begin to stitch your design.
10. When the design is completed, remove from machine and pull the bobbin thread to the wrong side of the machine and tie off both ends.
11. Place ruler in the center of the first design and make second mark 1” above first stitching.

12. Stitch the second row of your design. When second row is finished pull the bobbin threads to the wrong side and tie off.
13. Remove the Creative Bobbin Case and the bobbin from the machine.
14. Place the standard bobbin case into your machine.
15. Wind a bobbin with sewing thread and insert in the machine.
16. Thread machine with rayon embroidery thread.
17. Select a scallop stitch from your machine. If you have a creative icon™ sewing and embroidery machine, select stitch 8.7.1
18. Cut two pieces of Aqua Magic stabilizer 4"wide and the circumference of the pillow case.
19. Place the stabilizer strips together under the top edge of the pillow case. Begin stitching the scallop stitch with the points catching the top edge of the pillow case and the remaining part of the stitch stitching on the stabilizer.
20. Cut the extra stabilizer from the top of the stitch
21. Place the pillow case in water to remove the blue marks and the remaining stabilizer.
22. Dry slightly and spray with starch. Press into a towel from the wrong side to make your stitches pop.

ENJOY!!!!!!!!!!
